

Here's exactly what happens at each stage, what we ask of you, and what we handle. No surprises, no upsells, no hidden steps.

1

Tell us about your team

You — Spend 2 minutes on a short form at bestly.tech/cloud.

Us — Read it within the hour. Reply with a time for a 30-min call.

2

Pre-call brief

You — Answer a few deeper questions over coffee — at your pace.

Us — Auto-save every 30 seconds. Use your answers to come prepared.

3

Discovery call

You — 30 minutes. Tell us what your stack costs today.

Us — Show you a side-by-side: today vs. Bestly. You keep the PDF either way.

4

Scope + deposit

You — Review the SOW, sign in-browser, pay the deposit.

Us — Everything signed digitally on our own cloud — no third-party tools.

5

Technical intake

You — Your IT lead fills a guided form: domain, branding, users, policies.

Us — Email you the link the moment your deposit clears. We'll handle the rest.

6

We build it

You — Watch progress on a private status page that refreshes itself.

Us — Procure, image, configure, brand, migrate, test, certify.

7

Ship + install

You — Receive the hardware. Sign acceptance once it passes your checks.

Us — Tracking number on your status page. Remote or on-site install — your call.

8

Live + supported

You — Your team logs in at cloud.. Day one, fully branded.

Us — 30-day check-in, quarterly reviews, renewal milestones at Y1/Y2/Y3.

One promise. Your data lives on hardware you own. Your brand is everywhere your team logs in. You never pay per seat again.
