

Installation Acceptance

Bestly In-House Cloud — Sign-off & Live Confirmation

DRAFT — replace with finalized contract terms after legal review before any customer signs.

This Installation Acceptance is executed by **{{COMPANY_NAME}}** ("Customer") to confirm that the Bestly In-House Cloud deployment has been installed at Customer's premises and is ready for production use.

Confirmation checklist

Customer confirms each of the following:

- The Bestly Cloud Box is physically installed and powered on at Customer's site.
- Customer's chosen subdomain (cloud.{{DOMAIN}}) resolves and the login screen displays Customer's branding.
- At least one administrative user can log in successfully and access Files, Mail, Calendar, and Talk.
- A test file uploaded to Files is visible to a second test user.
- A test video call between two users connects with audio and video.
- A test mail send from system@{{DOMAIN}} is received externally.
- Off-site backup destination is configured and the first nightly backup has completed successfully.
- TLS certificates are valid for the chosen subdomain.
- Customer has received the operations runbook and disaster-recovery guide.

Effect of acceptance

Signing this acceptance triggers the start of any elected Bestly-managed support engagement, advances the deployment to live status in Bestly's records, and begins the 14-day post-install support window.

Outstanding items

Any items not yet complete should be listed below. Bestly will track them through resolution.
