

Statement of Work

Bestly In-House Cloud — Deployment Agreement

DRAFT — replace with finalized contract terms after legal review before any customer signs.

This Statement of Work ("SOW") is between Bestly LLC ("Bestly") and **{{COMPANY_NAME}}** ("Customer") effective on the date both parties sign below.

1. Scope

Bestly will design, configure, and deliver a Bestly In-House Cloud deployment to Customer's premises. The deployment includes the Bestly Cloud Box (a single physical server), white-labeled software stack, on-domain branding, encrypted off-site backup configuration, and the documentation necessary for Customer to self-manage from day one.

2. Deliverables

(a) **Hardware** — pre-configured Bestly Cloud Box shipped to Customer's address. (b) **Software stack** — Drive, Mail, Docs, Calendar, Video & Chat (Talk), DNS Shield, VPN, Backup, Projects, Forms, Passwords, E-sign, and Local AI services configured on Customer's domain. (c) **Branding** — Customer's logo, color palette, and subdomain wired across login, file-share, and system mail surfaces. (d) **User accounts** — provisioned from Customer's roster (per Stage 5c of the technical intake). (e) **Migration** — data migration from sources scoped in Stage 5d. (f) **Documentation** — full operations runbook + tested disaster-recovery guide.

3. Pricing

Deployment fee: **{{DEPLOYMENT_FEE}}**, payable as a non-refundable deposit on contract execution. Optional Bestly-managed support: **{{MONTHLY_SUPPORT_FEE}}/month**, billed monthly, cancelable with 30 days' notice.

4. Timeline

Hardware ships within 4–6 weeks of Customer's submission of the technical intake. Customer commits to a target install window within 2 weeks of hardware arrival. Bestly remains on-call for 14 days post-install for question and adjustment.

5. Customer responsibilities

Customer will: (a) provide a static IP or coordinate dynamic-DNS setup with Bestly; (b) designate an IT lead for install-day coordination; (c) own the chosen domain and grant DNS access for subdomain configuration; (d) complete the technical intake at /intake within 14 days of contract execution.

6. Data ownership

All Customer data — files, email, chat history, AI prompts and responses — remains Customer's property and is processed exclusively on Customer's premises. Bestly does not retain copies of Customer data outside the Customer's deployment except as required to provide configured backup services.

7. Term & termination

This SOW remains in effect through completion of the deployment and the 14-day post-install support window. Bestly-managed monthly support, if elected, runs month-to-month and may be canceled by either party with 30 days' notice. Customer retains full operational use of the deployment after termination of any support engagement.

8. Warranty & limitation of liability

[LEGAL: insert finalized warranty + limitation-of-liability terms before customer signs.]

9. Governing law

This SOW is governed by the laws of the State of California, without regard to its conflict of laws principles.
